THEME

New Frontiers in shaping the Future of Occupational Health & Well-Being

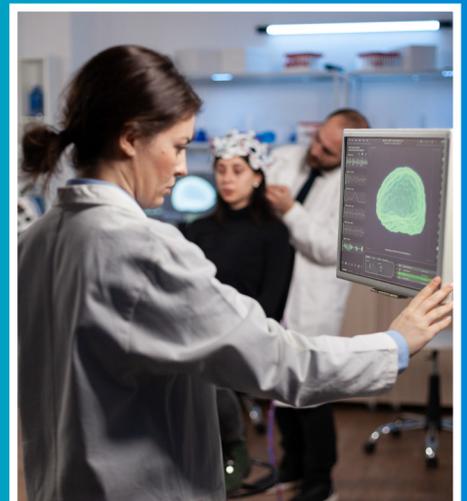

The world of work is undergoing unprecedented transformation driven by technological innovation, globalization, climate change, demographic shifts, and evolving employment models. Digitalization, artificial intelligence, remote and hybrid work arrangements, platform-based labor, and the green transition are redefining occupational risks and opportunities. Traditional occupational health and safety (OHS) frameworks, primarily focused on physical hazards, are increasingly inadequate to address emerging psychosocial, ergonomic, environmental, and ethical challenges.

At the same time, there is growing recognition that worker well-being extends beyond the prevention of injury and disease to encompass mental health, work-life balance, social protection, inclusion, and dignity at work. Organizations, policymakers, and practitioners are now called upon to adopt holistic, proactive, and future-oriented approaches to occupational health and well-being.

This conference aims to explore new frontiers—innovative concepts, tools, policies, and practices—that can shape resilient, healthy, and productive workplaces in a rapidly changing world of work.

CONFERENCE AIM

With the theme “New Frontiers in Shaping the Future of Occupational Health and Well-Being,” OCCUCLAVE 2026 aims to provide a multidisciplinary platform for dialogue, knowledge exchange, and collaboration on emerging trends, innovations, and strategies that advance occupational health and well-being in the future of work. The conclave will address evolving workplace health challenges arising from recent advances such as Artificial Intelligence, implementation of the new Labour Codes, Climate Change, and psychosocial issues impacting workforce health and well-being.

INVITATION

On behalf of the Organising Committee of the 11th Global Conclave of AEOHD–OCCUCLAVE 2026, scheduled to be held on 10th April 2026 at the SCOPE Convention Centre, SCOPE Complex, Lodhi Road, New Delhi – 110003, we are pleased to invite your esteemed organization to participate in OCCUCLAVE 2026.

OCCUCLAVE is the annual flagship conference of the Association of Environmental and Occupational Health, Delhi (AEOHD). AEOHD is affiliated with the Indian Association of Occupational Health, and its vision and mission are to promote excellence in occupational health and well-being. Over the years, OCCUCLAVE has served as an important platform for interaction among officers and professionals responsible for implementing statutory frameworks related to workplace health and well-being.

With the theme “**New Frontiers in Shaping the Future of Occupational Health and Well-Being,**” OCCUCLAVE 2026 will focus on addressing workplace health challenges in view of emerging advances such as Artificial Intelligence, implementation of the new Labour Codes, Climate Change, and psychosocial issues affecting the health and well-being of the workforce.

The Association of Environmental and Occupational Health, Delhi (AEOHD) is committed to enabling occupational health professionals to make India’s workplaces healthy, safe, and green, free from the ill effects of occupational hazards by evolving effective solutions. AEOHD aspires to be a nodal non-governmental organization committed to attaining the highest standards of health in India by enabling stakeholders, influencing policymakers, and creating community consciousness.

Renowned experts will lead the deliberations through keynote addresses, symposia, technical sessions, and scientific paper presentations. The conclave will feature a comprehensive and stimulating scientific program aimed at equipping delegates with practical insights to promote safe and healthy workplaces, thereby supporting sustainable and resilient organizations.

The conclave will witness participation from Practicing Occupational Health Physicians, Medical Professionals, Academicians and Research Scientists in Occupational Health, Epidemiologists, Ergonomists, Safety Specialists, Human Resource and Employee Relations Managers from industry, Officers’ Associations and Trade Union Representatives, and key Decision Makers.

We request you to kindly block the date and make it convenient to attend the conclave. Your participation and support will make this event a grand success. We also look forward to sponsorship support and early registrations, which will facilitate effective planning and enable us to warmly welcome you on 10th April 2026 for OCCUCLAVE 2026.

OBJECTIVES

The conference seeks to:

1. Enhance Understanding of Integrated Health Approaches:

Deepen participants' understanding of integrated and holistic health frameworks, including the One Health concept, highlighting the interconnectedness of human, animal, environmental, and occupational health in addressing complex global challenges.

2. Examine Emerging Occupational Health Risks and Opportunities:

Explore emerging occupational health risks and opportunities driven by technological innovation, changing work patterns, social transformations, and environmental factors, enabling proactive and future-ready responses.

3. Promote Evidence-Based and Innovative Practices:

Encourage the adoption of innovative tools, technologies, and evidence-based practices that enhance worker health, safety, productivity, and overall well-being across sectors.

4. Strengthen Integration of Mental Health and Psychosocial Well-being:

Emphasize the integration of mental health, psychosocial well-being, and decent work principles into occupational and public health systems to foster healthier, more inclusive workplaces.

5. Foster Cross-Disciplinary and Multi-Stakeholder Collaboration:

Promote collaboration among researchers, practitioners, policymakers, employers, workers' representatives, and professionals from diverse disciplines such as health, agriculture, environment, and social sciences.

6. Showcase Best Practices and Successful Case Studies:

Share real-world case studies and global best practices that demonstrate effective implementation of integrated health and occupational well-being strategies, offering practical insights and inspiration.

7. Build Practical Skills and Implementation Capacity:

Facilitate hands-on workshops and interactive sessions to equip participants with practical tools, methodologies, and frameworks for implementing integrated health and occupational safety approaches.

8. Inspire Innovation and Future-Focused Thinking:

Encourage creative and innovative thinking to explore new technologies, research methods, and policy approaches that advance sustainable health, safety, and well-being solutions.

9. Encourage Networking and Community Building:

Provide meaningful networking opportunities for participants to connect, exchange ideas, and build long-term professional relationships, fostering a committed community of practice.

10. Inform Policy and Practice Through Research and Dialogue:

Bridge the gap between research and real-world application by translating research findings, field experiences, and global insights into actionable policy and practice recommendations.

11. Empower Advocacy and Leadership:

Empower participants to act as advocates and leaders in promoting the integration of health, safety, and well-being principles into organizational strategies, policies, and governance frameworks.

12. Raise Awareness and Strengthen Communication Capacity:

Equip participants with the knowledge and communication skills needed to raise awareness about integrated health, occupational safety, and well-being within their organizations and communities.

13. Catalyse Collaborative Research Initiatives:

Encourage the development of collaborative and interdisciplinary research projects aimed at addressing complex health and workplace challenges through integrated and systems-based approaches.

14. Promote Sustainable and Decent Work Environments:

Support the creation of safe, equitable, and sustainable work environments by reinforcing the importance of decent work standards and long-term workforce well-being.

15. Encourage Continuous Learning and Long-Term Engagement:

Foster a culture of lifelong learning by promoting access to resources, knowledge platforms, and continued engagement beyond the conference to ensure lasting impact.

KEY THEMATIC AREAS

The conference will focus on, but not be limited to, the following thematic areas:

- The Future of Work and Emerging Occupational Risks
- Digitalization, automation, and artificial intelligence
- Platform and gig economy work
- Remote and hybrid work models
- Mental Health and Psychosocial Well-Being at Work
- Stress, burnout, and work-related mental disorders
- Psychosocial risk assessment and management
- Promoting positive workplace cultures
- Innovations in Occupational Health Practice
- Digital health tools and wearable technologies
- Data-driven and predictive approaches to risk prevention
- Integrating occupational health into primary health care
- Climate Change, Environmental Sustainability, and Worker Health
- Occupational health impacts of climate change
- Green jobs and sustainable workplaces
- Heat stress, environmental hazards, and adaptation strategies
- Equity, Inclusion, and Decent Work
- Gender, age, disability, and vulnerable worker considerations
- Informal sector and migrant worker health
- Ethical and human rights perspectives in occupational health
- Policy, Governance, and Systems Strengthening
- National and organizational OHS systems
- Regulatory innovation and compliance in a changing world
- Social dialogue and stakeholder engagement

PARTICIPANTS & INVITEES

The target participants and Invited Attendees for OCCUCLAVE-2026 focuses on “New Frontiers in Shaping the Future of Occupational Health and Well-Being ” advocated by the World Health Organisation (WHO) would ideally include professionals, experts, and stakeholders from various fields related to health, agriculture, environment, and policy-making. This may encompass:

1. Policy Makers:

Government officials and policymakers involved in health, agriculture, and environmental policy development and implementation.

2. Health Professionals:

Including doctors, veterinarians, nurses, and other healthcare practitioners to address human and animal health aspects.

3. Human Resource Professionals:

Who are actively engaged in the field of HR management, talent acquisition, employee relations, and related areas. This includes HR executives, managers, consultants, recruiters.

4. HSE Professionals:

HSE Managers and Directors, Safety Officers and Coordinators, Environmental Compliance Specialists, Industrial Hygienists, Risk Managers, Emergency Response Coordinators, Occupational Health Professionals, HSE Consultants, HSE Educators and Trainers.

5. Environmental Scientists:

Those specializing in environmental health, ecology, and related fields to contribute insights on the environmental component of One Health.

6. Industry Representatives:

Involving industries related to health, agriculture, and environment to explore collaborative approaches and innovative solutions.

7. Researchers and Academics:

Scholars and researchers from various disciplines contributing to the academic understanding and advancement of One Health.

8. Students and Emerging Professionals:

Encouraging the participation of students and early-career professionals to foster the next generation's commitment to One Health.

9. Community Leaders:

Engaging community leaders who play a vital role in translating One Health principles into local practices and policies.

10. Non-Governmental Organizations (NGOs):

Representatives from organizations actively involved in health, environmental, & animal welfare issues.

11. International Organizations:

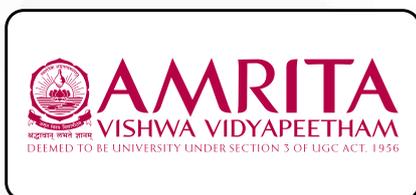

Collaboration with international organizations working on global health initiatives, aligning with the WHO's advocacy for One Health.

12. Food Safety & Agro Industry Experts:

Equip participants with the knowledge and communication skills needed to raise awareness about integrated health, occupational safety, and well-being within their organizations and communities.
